Janet Wang

28 Age Email: janet0927w@outlook.com
Highest Education: Master Desired Job Title: Full Stack Engineer

Introduction

Senior Full Stack Developer with 7+ years of experience building scalable web applications and cloud-based systems. Strong expertise in Python, TypeScript, React, Next.js, and modern backend frameworks, developing high-performance APIs and microservices architectures. Experienced in integrating AI technologies including LLM APIs and Retrieval-Augmented Generation (RAG) systems. Skilled in AWS cloud infrastructure, Docker, Kubernetes, and CI/CD pipelines, with a focus on building secure, reliable, and production-ready applications.

Work Experience

Full Stack Developer

Airbnb(Contract) 2023-11 - 2026-03

- Designed and implemented scalable backend services using Python and FastAPI for enterprise-level SaaS platforms.
- Built modern front-end applications using React and Next.js delivering responsive and user-friendly interfaces.
- Integrated AI-powered functionality such as LLM APIs, automated content generation, and semantic search systems.
- Developed microservices-based architecture deployed on AWS using Docker containers and Kubernetes orchestration.
- Built secure and high-performance REST APIs used by internal systems and external enterprise clients.
- Implemented CI/CD pipelines to automate testing, deployment, and system monitoring.
- Collaborated closely with product managers, designers, and DevOps engineers in Agile Scrum development environments.
- Improved system performance by optimizing database queries, caching strategies, and API response times.

Full Stack Developer

Etsy (Contract) 2022-11 - 2023-11

- Developed scalable web applications using React, Node.js, and Python for marketing automation platforms.
- Designed and implemented RESTful APIs supporting complex business logic and large-scale data processing.

- Built responsive and accessible UI components improving overall product usability and performance.

Full Stack Developer

ADP (Contract) 2022-01 - 2022-11

- Built and maintained backend services and APIs supporting enterprise applications.
- Developed front-end features using React and modern JavaScript frameworks.
- Assisted in database design, integration, and performance optimization for high-traffic applications.
- Implemented concurrent and asynchronous processing to improve application performance.

Full Stack Developer

China Telecom 2021-06 - 2021-12

- Assisted in implementing CI/CD pipelines for automated build, testing, and deployment processes.
- Built and maintained ETL pipelines for data processing and analytics workflows.
- Supported migration of legacy systems to modern cloud infrastructure using AWS and Azure.
- Collaborated with senior developers and DevOps engineers to improve development workflows and deployment processes.

Full Stack Engineer

Asiainfo 2019-01 - 2021-05

- Collaborated closely with product managers, designers, and DevOps engineers in Agile Scrum development environments.
- Improved system performance by optimizing database queries, caching strategies, and API response times.
- Built secure and high-performance REST APIs used by internal systems and external enterprise clients.

Education

Lehigh University

Computer Science

2015-09 - 2018-07

Skills

- Python - Expert
- Next.js - Expert
- HTML5 / CSS3 - Expert
- Docker - Experienced
- JavaScript - Expert
- TypeScript - Expert
- PostgreSQL - Expert
- Express.js - Experienced
- Node.js - Expert
- AWS - Experienced
